## LONG-LASTING CRUSTACEAN BAIT FOR USE IN TRAPS AND METHOD OF MAKING THE SAME

## ABSTRACT OF THE DISCLOSURE

for improved bait use in attracting 5 An crustaceans in traps and pots is disclosed which is particularly long-lasting when used in such traps and any wide variety of of а underwater environments, together with a preferred method for making the crustacean bait. The improved crustacean 10 bait is made of hides such as cowhides which are processed to remove the hair therefrom, and then is cured and cut into pieces of an appropriate size for use as crustacean bait in traps or pots. The pieces of improved crustacean bait may be packaged in sealed 15 bulk packages which do not require refrigeration. improved crustacean bait is very long-lasting when placed into a trap or pot in the ocean, neither decompose over an extended period of time nor degrade in its attractiveness to lure crustaceans over 20 an extended period of time.
